

Stephen Ricketts

Full Stack Developer

👤 Profile

I am a full stack developer with a proven record of producing quality code for production releases. I have published apps in the Google Play Store, the Apple App Store, the Overwolf store, and I have built production web apps from scratch. I also love to learn and I am capable of picking up new skills quickly.

💼 Employment History

Lead Front End Developer at Liifer Technologies, Remote

May 2021 — November 2023

- In this position I created the front end for a hybrid app using React, Typescript, and Tailwind CSS.
- Many libraries and tools were used in the development of this app, including react-query, redux, react-router, axios, i18next, react-hook-form, react-table, google services API, Overwolf API, Ionic Capacitor, and react-testing-library.
- This app also has an Overwolf extension, which allows gamers to order food while in-game. Some other interesting features I implemented in this extension are user game tracking and in-game notifications. This app is currently available in the Overwolf store.
- I also ported this application to IOS and Android, through Ionic Capacitor. These ports passed verification and are available in the Apple App Store and the Google Play store.

Freelance Web Developer at SeonVision, Montréal

March 2021 — May 2021

- For this short-term contracted position, I built a landing page for a small start-up company for their application called SeonTaste. To do this I used tailwind CSS and React.
- I also did some work on their React Native application, which had been built by another contractor.

🎓 Education

Diploma in Full-Stack Web Development, Concordia University, Montréal

September 2019 — December 2019

I completed an intensive full-stack web development course focused on programming fundamentals including test-driven development, object-oriented programming, SCRUM, Agile methodologies, pair-programming, algorithms and databases, with a focus on React and JavaScript.

Bachelor of Arts, Psychology, University of New Brunswick, Fredericton, New Brunswick

September 2008 — May 2012
